

How to accelerate the pay-for-skills conversation in your organization?

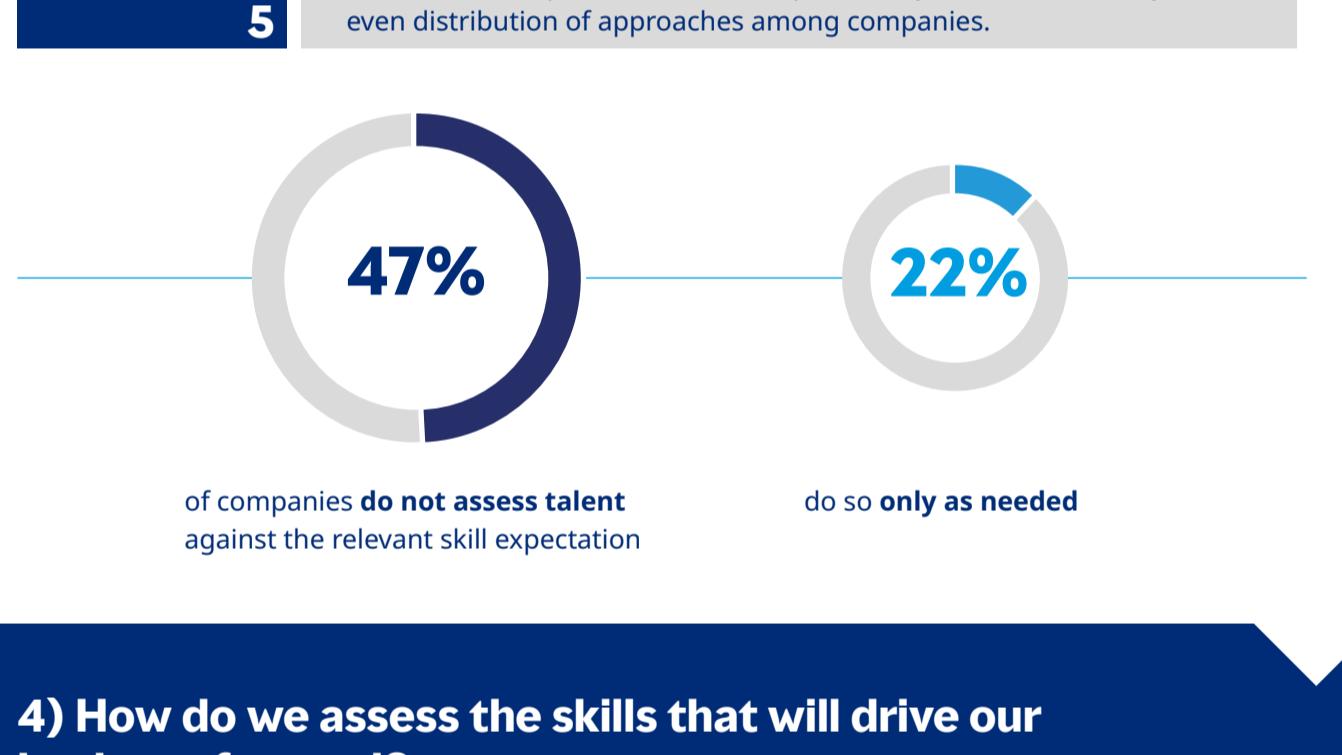

Start with these five key questions:

1) What do we aim to achieve through skills-based pay?

2) What skills do we need to track and how will we incorporate a skills taxonomy into our job architecture?

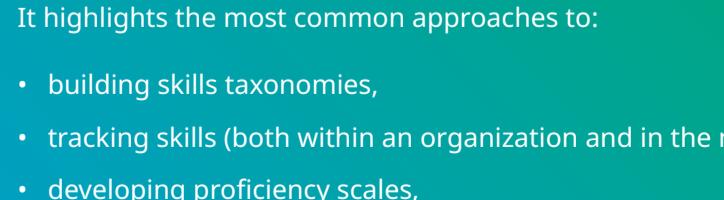

3) What skill proficiency level do we expect for each role?

4) How do we assess the skills that will drive our business forward?

Monitoring skills across all employee groups is a sound, competitive strategy.

Companies are still building their familiarity with the skills-tracking platforms and the related data sets that have emerged and are starting to mature.

Remember, today's hot skill or hard-to-hire role can quickly evolve and affect varying roles in your organization!

A **minority** of companies (just 8%) **monitor the market** demand or availability of skills formally whereas **60% report informal monitoring**.

It highlights the most common approaches to:

- building skills taxonomies,
- tracking skills (both within an organization and in the market),
- developing proficiency scales,
- operationalizing pay-for-skills strategies.
